Cantr II

Play your role in the interactive society simulator! Develop political systems or economic structures, write news-papers or make a business, fight wars or become world's smartest criminal – it is all possible in *Cantr II*!

www.cantr.net

Cantr II is a free, online, text- and web-based multi-user role-playing game available in several languages and permanently under development. It aims at creating a mixture between freestyle role-playing and a computer-based game, while the main focus is on the creation of the institutional structure of society – everything, politics, economics, laws, newspapers, etc., is created by the players and not by the programmer or game master.
